

SAFETY DATA SHEET

Section 1. Product Identification

Product identifier

AccuCrete®, AccuLevel®, AccuRadiant®

Other means of identification

SDS number ACG 2000

Additional Products AccuLevel® G-40, AccuLevel® G-50, AccuLevel® H40, AccuLevel® G40 Pre-Sanded,

AccuLevel® H40 Pre-Sanded, GSLK 2.6, M 3.4, AccuCrete® Prime, AccuCrete® NexGen,

GSL RH, GSL CSD

Synonyms Mixture of Plaster of Paris, Portland Cement and Limestone.

Recommended use Flooring and Construction.

Recommended Restrictions Use in accordance with manufacturer's recommendations.

	Section 2. Hazard(s) Identification
Emergency Overview	This product is not flammable, combustible, or explosive. It does not cause burns or severe skin or eye irritation. A single exposure will not result in serious adverse health effect. Prolonged contact with the product may result in abrasions or burns to the skin or irritation of the eyes. Prolonged inhalation of the dust may irritate the respiratory tract.
Physical hazards	Not classified.
Health Hazards	Not classified.
Acute:	Contact can cause machanical imitation of avec If huming madness itahing main on other
Eyes	Contact can cause mechanical irritation of eyes. If burning, redness, itching, pain or other symptoms persist or develop, consult physician. Eye irritation Category 2, subcategory 2B.
Skin	This material hardens and slowly becomes hot when mixed with water. Therefore, it SHOULD
2	NOT be used to make a cast enclosing any part of the body. Failure to follow these instructions
	can cause burns that may require medical attention. Burns from exposure to Portland cement can
	occur 12 to 48 hours after exposures of 1 to 6 hours. Burns may occur without obvious pain at
	the time of exposure. Portland cement will not cause an alkaline burn by itself in dry form.
	However, direct prolonged or repeated contact with the skin may cause irritation. Rubbing of this
	product against the skin can result in abrasions. Rinse with water until free of material to avoid
	abrasions, and then wash skin thoroughly with mild soap and water. May dry skin. Mild Skin Irritation Category 2.
Inhalation	Inhalation of dusts from this product may irritate the nose, throat, lungs, and upper respiratory
imatation	tract. Persons exposed to large amounts of this dust may be forced to leave area because of
	nuisance conditions such as coughing, sneezing, and nasal irritation. Labored breathing may
	occur after excessive inhalation. If respiratory symptoms persist, consult physician.
Ingestion	Harmful if swallowed. Plaster of Paris is non-toxic; however, ingestion of a sufficient quantity
-	could lead to mechanical obstruction of the gut, especially the pyloric region. See Section 4.
Chronic:	Gypsum and Portland cement display no specific toxic properties.
Inhalation	Prolonged and repeated exposure to respirable crystalline silica can result in lung disease (i.e.
	silicosis) and lung cancer. Silicosis increases the risk of tuberculosis. Studies have shown various
	autoimmune and chronic kidney diseases in workers exposed to respirable crystalline silica. Some studies show and increased incidence of chronic bronchitis and emphysema in workers
	exposed to crystalline silica.
Skin	Dermatitis.
Ingestion	Burns to esophagus and stomach.
ingestion	Zama to toopingas and stomach.

SDS ID: ACG 2000 Version#: 05 Revision date: 16 Sept 2019 Page **1** of **6**

Environmental hazards OSHA defined hazards

Not Classified. Not Classified.

Label elements

Signal word

Danger

Hazard statement

Harmful if swallowed. Causes eye and skin irritation. May cause allergy or asthma symptoms

or breathing difficulties if inhaled.

Precautionary statement

Prevention

Wash hands thoroughly after handling,. Wear protective gloves. Avoid breathing dust. Wear respiratory protection. Do not eat, drink, or smoke when using this product. Contact lenses should not be worn while using Portland cement.

Response

If eye irritation persists, if skin irritation occurs, or if experiencing respiratory symptoms: Get

medical advice/attention. If swallowed: Call a doctor if you feel unwell.

Storage

Store as indicated in Section 7.

Disposal

Dispose of in accordance with local, state, and federal regulations.

Hazard(s) not otherwise classified (HNOC)

None known.

Section 3. C	omposition/Information on Ingredients	
Mixtures		
Chemical name	CAS number	%
Calcium Sulfate Hemihydrate	26499-65-0	72-97
(Plaster of Paris)		
Portland Cement	65997-15-1	2-10
Silicon Dioxide (Crystalline Silica)	14808-60-7	< 0.025
Calcium Carbonate	1317-65-3	0-15

Composition comments

All concentrations are in percent by weight unless ingredient is a gas.

	Section 4. First-Aid Measures			
Eye contact	If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and			
	easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.			
Skin contact	If on skin: Wash with plenty of water/mild soap and water. Specific treatment: see supplemental			
	first aid instruction on label. If skin irritation occurs: Get medical advice/attention. Take off			
·	contaminated clothing and wash it before reuse.			
Inhalation	If inhaled: If breathing is difficult, remove person to fresh air and keep comfortable for breathing.			
	If experiencing respiratory symptoms: Call a doctor.			
Ingestion				
Target Organs:	Eyes, skin and respiratory system.			
Medical Conditions which	which Pre-existing upper respiratory and lung diseases such as, but not limited to, bronchitis, emphysema,			
may be aggravated	and asthma.			

SDS ID: ACG 2000 Version#: 05 Revision date: 16 Sept 2019 Page 2 of 6

Primary Routes of entry: Inhalation, eyes and/or skin contact, ingestion.

	Section 5. Fire and Explosion Hazard Data
Flash Point	Non-combustible

Auto-Ignition Not applicable.
Flammable limit Not applicable.

Fire Extinguishing MediaUse extinguishing media appropriate for surrounding fire. **Special Fire-fighting**Wear proper personal protective equipment as listed in Section 8.

Special Fire-fighting Procedures

Hazardous combustion Not applicable.

procedures

Explosion Hazards None known.

Section 6. Accidental Release Measures				
Methods and materials for Remove by dry sweeping or vacuum. Avoid creating excessive dust. It is recommended that glove				
containment and cleaning up and a mask be worn while cleaning the spill. If already mixed with water, scrape up and place				
container. Wear appropriate protective equipment as described in Sections 7 & 8.				
Environmental precautions	Dispose of material in accordance with all applicable federal, state and local regulations.			
	Can be disposed as an inert solid in a landfill. Slurry may plug drains.			

Section 7. Handling and Storage					
Precautions for safe	Avoid contact with skin and eyes. Do not breathe dust. Use only in well ventilated areas. A NIOSH				
handling	andling approved dust mask or filtering face piece is recommended in poorly ventilated areas or whe				
	permissible exposure limits may be exceeded. When using, do not eat or drink. Wash hands before				
	eating, drinking or smoking.				

Conditions for safe storage, including an incompatibilities

Keep out of reach of children. Keep the container tightly closed and dry. Store in a covered, dry climate controlled area, away from incompatibles listed in Section 10.

Section 8. Exposure Controls/Personal Protection

Occupational exposure limits

US. OSHA table Z-1 Limits for Air Contaminants (29 CFR 1910.1000

Components	Type	Value	Form	
Plaster of Paris	PEL	5 mg/m3	Respirable.	
Portland Cement	TWA	5 mg/m3	Respirable.	
Crystalline Silica	TWA	5 mg/m3	Respirable	
Calcium Silica	TWA	10 mg/m3	Respirable	

US. ACGIH Threshold Limit Values

Components	Type	Value	Form	
Plaster of Paris	TWA	10 mg/m3	Inhalable fraction.	
Portland Cement	TWA	1 mg/m3	Respirable	
Crystalline Silica	TWA	0.025 mg/m3	Respirable.

Crystalline Silica	TWA	.05 mg/m3	Respirable
Calcium Silicate	TWA	10 mg/m3	Respirable

ventilation is expected to be satisfactory, Use local exhaust ventilation if necessary to control dust.

Respiratory protectionNone required where adequate ventilation conditions exist. A NIOSH approved dust mask or

filtering face piece is recommended in poorly ventilated areas or when permissible exposure limits may be exceeded. Consult with respirator manufacturer to determine respirator selection, use, and

limitations.)

Section 9. Physical and Chemical Properties

Appearance Grey

Physical statePowder/Solid.Melting PointNot applicable.Freezing PointNot applicable.

Odor Low.

Odor threshold Not determined.
Flash point Non-combustible.
Flammability limits Not applicable.

Solubility (in water) (g/100g) 0.15%

Initial boiling pointNot applicable.Boiling RangeNot applicable.Specific gravity2.6-3.0pH10-12

Hardening time45-120 minutes.Vapor pressureNot applicable.Vapor densityNot applicable.

Auto-ignition temperature None.

Evaporation rateNot applicable.ViscosityNot applicable.Upper flammability limitNot determined.Lower flammability limitNot determined.Decomposition temp1,450°C/2642°F

Section 10. Chemical Stability and Reactivity

Conditions of reactivity Reacts with water and produces large amounts of heat (normal condition of use).

Chemical stability Stable at normal storage conditions and temperature.

Conditions to avoid Water, high humidity, and acids.

Hazardous decomposition products Stable at normal storage conditions and temperature.

Hazardous polymerization None known.

Section 11. Toxicological Information

Information on likely routes of exposure

Acute effects The acute oral toxicity study [OECD TG 420] of calcium sulfate dihydrate showed that

this chemical did not cause any changes and there was no evidence of germ cell

mutagenicity.

SDS ID: ACG 2000 Version#: 05 Revision date: 16 Sept 2019 Page **4** of **6**

Chronic effects Crystalline Silica: Exposures to respirable crystalline silica are not expected during the

normal use of this product; however, levels must be determined by in-house workplace

hygiene testing.

Section 12. Ecological Information

Ecotoxicity There are no known causes from this product that would harm the Ecology. However, the

Portland cement has high alkaline properties (pH > 12), which are expected to be toxic to fish. The disposal of large quantities directly into waterways would be expected to cause

significant aquatic life death.

Section 13 Disposal Considerations

Disposal procedureDispose of material in accordance with all applicable federal, state and local regulations.

Can be disposed as an inert solid in a landfill. Slurry may plug drains. Do not dispose of

directly in waterways or sewers.

Section 14. Transport Information

Department of Transportation (DOT)

Requirements

This product is not regulated as a hazardous material by the United States (DOT)

transportation regulations.

Canadian Transportation of

dangerous goods

Not regulated as dangerous goods.

UN# None Not regulated as dangerous goods.

ADNR None.

RID/ADR: Not classified.

Environmental hazards None.

Annex II of MARPOL 73/78 Not applicable.

International bulk chemical code Not applicable.

Section 15 Regulatory Information

U.S. EPA's Toxic Substance Control Act Chemical Substance Inventory

Not listed as reportable quantity or regulated quantity in SARA Title III Sections 302, 304, and 313. CAA Section 112® Regulated Chemicals for Accidental Release

Prevention, CERLA Hazardous Substances, and RCRA Hazardous Waste.
